

Peter Weckend

EXPERIENCE

Software Developer II — Dotdash Meredith

JULY 2021 - PRESENT, EDMONTON AB (REMOTE)

- Design and code features for a highly performant in-house framework that services over 25 major websites with hundreds of millions of monthly visitors

Software Developer, Squad Lead — Haemonetics

MAY 2017 - JULY 2021, EDMONTON AB (REMOTE)

- Developed and optimized an array of medical software applications used worldwide using primarily C#, Java, Angular, SQL, HTML, and CSS
- Supervised and assigned work to a team of 7 developers and testers using the Agile Scrum methodology
- Resolved a major performance issue affecting client production servers by simulating hundreds of thousands of users in a mock environment

Software Team Member — AlbertaSat

JULY 2019 - MARCH 2020, EDMONTON AB

- Contributed to the testing and coding of the bootloader for a satellite being built at the University of Alberta as part of the Canadian Space Agency's CubeSat Project

Support Staff, Site Operator — DECO

JUNE 2016 - NOVEMBER 2016, EDMONTON AB

- Maintained and improved sales/customer datasets, analytics, and reports using Zapier, Klipfolio, and Excel
- Provided hardware and software technical support to ~300 employees

PROJECTS

To-Do Board — todoboard.ca

- Helped build a responsive React web app that allows users to remotely collaborate together using shared to-do lists, notes, and pomodoro timers

FoodFriendly — bit.ly/3trUVIF

- An MVP iOS app that allows vegetarians and vegans to find and review compatible menu items of restaurants in their area using Swift and Firebase

Connectify Social Media Platform — bit.ly/3uu14zn

- A responsive social media web app that can interface with other web apps, created as part of a semester-long university group project using Django, SQL, HTML, CSS, and Heroku
